## All India Online Painting Competition

### We and our Nature!

Mother Earth is our only habitat and there is no other place ideal for living in this universe. Apart from humans, this is a home to millions of other species. A perfect ecological balance makes this planet a better place to live-in. Humans are constantly neglecting this rule by creating a chaos in the environment through their careless behavior. We invade the habitat of other species and in turn create an ecological imbalance that would make our planet inhabitable.

(COVID-19) is a dreaded disease across the globe. Caused by Novel Corona Virus this pandemic is the worst hit in centuries of mankind. To overcome this situation, humans must develop immense body immunity and maintain cleanliness.

This is just a wake-up call from nature for us to introspect and correct our careless attitude towards nature and if unheeded could be devastating. Nature is sending signals to humans that we are no different from the rest of the million species inhabiting this planet and any further negligence will lead. Our Human Extinction must maintain the ecological balance by maintaining love and empathy towards all living beings to co-exist in a peaceful environment. All of us must be compassionate with each other and live a harmonious life.

**SATGURU THE SCHOOL OF ARTS** has been forefront in nurturing fine art skills in the young for the past two decades. This is a phase when the whole student fraternity is resting at home due to the pandemic, along with their parents, as well. Let us now start to introspect and design an amicable way of life that supports the entire ecosystem on this planet Earth.

### Category- 1, LKG to UKG, Topic: Your Choice

### Category- 2, 1st to 2nd, Topic: Hygiene (Swatch)

Cleanliness is godliness. Kids can explore the good habits in our day to day behaviour in the home and outside the home to make our planet clean and green.

### Category- 3, 3rd to 6th Std, Topic: Health (Swasth)

Body and mind health, Inner and outer peace matters for a healthy relationships between people, between communities and between nations. We want the young students to depict their understanding of the world to portray healthy relationships to make this world a happy place to live.

### Category- 4, 7th to 10th Class, Topic : We and Our Nature

Most of us people think human is special, great, supreme. Wanted to exploit and control the natural resources. Is it true? Can we survive without the support of the rest of life and non-life on earth? We want highschool students to explore the relationship between humans and the rest of planet from the development stand point of view.

### Category- 5, Inter & Degree, Topic: How to protect ourselves from future epidemics or pandemics

We learn more from our failures than our successes. There were earlier warnings from nature like plague, cholera, SARS, MERS and now it is Novel Corona Virus (COVID-19). The planet also experienced natural calamities like Global Warming, wild forest fires, floods, tornados, hurricanes and earth quakes. These natural disasters will not cease to strike this planet until we overcome and discontinue our old careless habits of neglecting the environment. Participants explore the learning from this pandemic and reinforce the learning to prevent a repeat of a similar critical situation in future.

### Category- 6, Open to All (Elders),

### Topic: Corona- Novel Corona Virus (COVID-19) - Public responsibility

Humans are social beings. People don't like to hurt others, in general. Pandemics don't discriminate. We may cause harm to others even without knowing the results of our thoughtless actions. Participants explore the new behavior in this lock down period to rectify our careless attitude and act with utmost care towards the environment. These corrective measures must maintain an ecological balance which in turn would avoid such a calamity in future for the benefit of mankind.
